Preface

This publication provides data on Quarterly Gross Domestic Product (GDP) estimates for the four quarters of 2023, the annual figure for 2023, the four quarters of 2024 and the annual figure for 2024.

Quarterly National Accounts (QNA) are integrated systems of macroeconomic accounts designed to describe the entire system of production in a nation quarterly. They provide a picture of the current status of the economy that is timely and more frequent than that provided by Annual National Accounts (ANA). The key attribute of QNA is that they provide a reasonable level of detail of the economy that helps the government to assess, analyse, and monitor economic growth regularly.

QNA adopts the same concepts, definitions, and structure as ANA. In principle, QNA covers the entire sequence of accounts and balance sheets as reflected in the 2008 System of National Accounts (2008 SNA).

Data for this analysis were obtained from the Quarterly Establishment Survey (QES) conducted by the National Bureau of Statistics (NBS). This series covers major aggregates of quarterly GDP by kind of economic activities at current and constant (2010) prices.

We are grateful to the various agencies and establishments that made their data available as input to the estimates.

Introduction

The National Bureau of Statistics (NBS) has been conducting Establishment Surveys to provide data for the estimation of the Gross Domestic Product (GDP) for the country. In 2008, NBS started to improve the GDP series by conducting Quarterly Establishment Surveys (QES) for the four quarters of each year to provide timely estimates for decisions and policymaking.

In 2018, the National Bureau of Statistics (NBS) conducted the Quarterly Establishment Surveys for the first three quarters of 2018 (Q1-Q3/ 2018), while the fourth quarter survey for 2018 was conducted in the first quarter of 2019. This compilation procedure is carried out to date publishing the Q4 GDP report within the first quarter of the new accounting year. It is important to note that the Bureau maintains a publication date of 45 days after the quarter.

In subsequent sections of this report, emphasis will be given to the composition of GDP in the fourth quarter of 2024, the corresponding quarter of 2023, and the immediate past quarter of 2024 (Q3 2024).
