Preface

This publication provides data on Quarterly Gross Domestic Product (GDP) estimates for the four quarters of 2024, the annual figure for 2024, and the first, second and third quarter of 2025. The figures presented in the report are newly obtained quarterly estimates, benchmarked to the annual rebased estimates. This technique allows for national accounts quarterly time series data on the rebased estimates.

Quarterly National Accounts (QNA) are integrated systems of macroeconomic accounts designed to describe the entire system of production in a nation quarterly. They provide a picture of the current status of the economy that is timely and more frequent than that provided by Annual National Accounts (ANA). The key attribute of QNA is that they provide a reasonable level of detail of the economy that helps the government to assess, analyse, and monitor economic growth regularly.

QNA adopts the same concepts, definitions, and structure as ANA. In principle, QNA covers the entire sequence of accounts and balance sheets as reflected in the 2008 System of National Accounts (2008 SNA).

The data for Q3 2025 were obtained from the Quarterly Establishment Survey (QES) conducted by the National Bureau of Statistics (NBS). This series covers major aggregates of quarterly GDP by kind of economic activities at current and constant (2019) prices.

We are grateful to the various agencies and establishments that made their data available as input to the estimates.

Introduction

The National Bureau of Statistics (NBS) has been conducting Establishment Surveys to provide data for the estimation of the Gross Domestic Product (GDP) for the country. In 2008, NBS started to improve the GDP series by conducting Quarterly Establishment Surveys (QES) for the four quarters of each year to provide timely estimates for decisions and policymaking.

In 2018, the National Bureau of Statistics (NBS) conducted the Quarterly Establishment Surveys for the first three quarters of 2018 (Q1-Q3/ 2018), while the fourth quarter survey for 2018 was conducted in the first quarter of 2019. This compilation procedure is carried out to date, publishing the Q4 GDP report within the first quarter of the new accounting year. It is important to note that the Bureau maintains a publication date of 45 days after the quarter.

In subsequent sections of this report, emphasis will be given to the composition of GDP in the third quarter of 2025, the corresponding quarter of 2024, and the immediate past quarter of 2025 (Q2 2025).

Overview of GDP in Quarter Three 2025

Following the rebasing of the Gross Domestic Product using 2019 as the base year, previous quarterly GDP estimates were benchmarked to the rebased annual estimates to align the old series with the new rebased estimates. This procedure provided a new quarterly GDP series, which is compared to the 2025 third quarter estimates. Gross Domestic Product (GDP) grew by 3.98% (year-on-year) in real terms in the third quarter of 2025. This growth rate is higher than the 3.86% recorded in the third quarter of 2024. During the quarter under review, agriculture grew by 3.79%, an improvement from the 2.55% recorded in the corresponding quarter of 2024. The growth of the Industry sector stood at 3.77% from 2.78% recorded in the third quarter of 2024, while the Services sector recorded a growth of 4.15% from 4.97% in the same quarter of 2024. In terms of share of the GDP, the services sector contributed more to the aggregate GDP in the third quarter of 2025 at 53.02% compared to the corresponding quarter of 2024 at 52.93%.

In the quarter under review, aggregate GDP at basic price stood at N113,587,291.77 million in nominal terms. This performance is higher when compared to the third quarter of 2024, which recorded an aggregate GDP of N96,160,479.86 million, indicating a year-on-year nominal growth of 18.12%. For better clarity, the Nigerian economy has been classified broadly into the oil and non-oil sectors (Pages 5 & 6).
