## Nigeria Labour Force Survey Q2 2024 (NLFS Q2 2024)

*No translation*

Overview	
Type	Labor Force Survey [hh/lfs]
Identification	NGA-NBS-NLFS-Q22024-v1.0.
Version	v1.0 anonymized microdata Notes This dataset is the anonymized version of the cleaned dataset of the Nigeria Labour Force Survey Quarter 2, 2024.
Series	<p>The Nigeria Labour Force Survey (NLFS) is a statistical survey designed to collect comprehensive data on employment, unemployment, and other characteristics of the population labour force. It provides quarterly estimates of the main labour force statistics with sufficient precision at the national level. This report contains findings from the Nigeria Labour Force Survey (NLFS) for the second quarter of 2024. The statistics are measured based on the labour force framework as guided by the international standard for labour market statistics for international comparability and the specific data requirements for the country.</p> <p>The main objective of the NLFS is to collect basic statistics on the labour market situation in Nigeria and make labour statistics available to support government policies and programmes for effective planning, and for the private sector to support investment decision-making aimed at improving the employment situation in the country. The Labour Force Survey also serves as a tool for monitoring progress towards national goals and global commitments with an overarching goal of promoting the welfare of the Nigerian population while ensuring the availability of labour market statistics to feed into the global sustainable development goals agenda. Labour is often one of the most important factors of production and is a major determinant of the economic system globally. Therefore, it is imperative to know whether people are working or not, how long they work, and the nature of the jobs they are engaged in.</p> <p>The NLFS enables key labour market statistics and the employment situation to be monitored periodically in Nigeria. The indicators include the labour force participation rate, employment-to-population ratio, unemployment rate, time-related underemployment, self-employment, labour underutilisation, and other key job characteristics.</p>

### **Abstract**

The Nigeria Labour Force Survey (NLFS) is a statistical survey designed to collect comprehensive data on employment, unemployment, and other characteristics of the population labour force. It provides quarterly estimates of the main labour force statistics with sufficient precision at the national level. This report contains findings from the Nigeria Labour Force Survey (NLFS) for the second quarter of 2024. The statistics are measured based on the labour force framework as guided by the international standard for labour market statistics for international comparability and the specific data requirements for the country.

The main objective of the NLFS is to collect basic statistics on the labour market situation in Nigeria and make labour statistics available to support government policies and programmes for effective planning, and for the private sector to support investment decision-making aimed at improving the employment situation in the country. The Labour Force Survey also serves as a tool for monitoring progress towards national goals and global commitments with an overarching goal of promoting the welfare of the Nigerian population while ensuring the availability of labour market statistics to feed into the global sustainable development goals agenda. Labour is often one of the most important factors of production and is a major determinant of the economic system globally. Therefore, it is imperative to know whether people are working or not, how long they work, and the nature of the jobs they are engaged in.

The NLFS enables key labour market statistics and the employment situation to be monitored periodically in Nigeria. The indicators include the labour force participation rate, employment-to-population ratio, unemployment rate, time-related underemployment, self-employment, labour underutilisation, and other key job characteristics.

<b>Kind of Data</b>	Sample survey data [ssd]
<b>Unit of Analysis</b>	Individual

## Scope & Coverage

### Scope

The Scope of the Nigeria Labour Force Survey includes:

SECTION A: IDENTIFICATION

SECTION B: DEMOGRAPHIC CHARACTERISTICS (INCLUSION OF DISABILITY QUESTIONS)

SECTION C: EDUCATION (FOR THREE YEARS OR OLDER)

SECTION D1: EMPLOYED AT WORK (ATW)

SECTION D2: TEMPORARY ABSENCE (ABS)

SECTION D3: AGRICULTURAL WORK AND MARKET ORIENTATION (AGF)

SECTION E: CHARACTERISTICS OF MAIN AND SECONDARY JOB, WORKING TIME AND INCOME

SECTION F: UNEMPLOYMENT AND OUT OF LABOUR FORCE

<b>Countries</b>	Nigeria
------------------	---------

### Geographic Coverage

National

Zone

State

Sector

### Universe

Household Members

## Producers & Sponsors

<b>Primary Investigator(s)</b>	National Bureau of Statistics, Federal Government of Nigeria (FGN)
<b>Other Producer(s)</b>	World Bank (WB) , Technical Support International Labour Organization (ILO) , Technical Support
<b>Funding Agency/ies</b>	Federal Government of Nigeria (FGN)

## Sampling

### Sampling Procedure

The target sample for the entire year is 35,520 households divided across 12 months, meaning the target sample for each quarter is 8,880 households. After small levels of non-response and replacement, the final sample for Q1 2024 is 8,836 households across the 36 states including the FCT.

### Deviations from Sample Design

No Deviations

### Response Rate

The household response rate is 100%.

### Weighting

The weighting was computed, normalised and attached to the dataset.

<b>Data Collection</b>	
<b>Data Collection Mode</b>	Face-to-face [f2f]
<b><u>Data Collection Notes</u></b> A Face-to-face interview approach was used for the data collection with the aid of a Computer Assisted Personal Interviewing (CAPI) device. This enables data transmission from the field to the headquarters to be done electronically. Each team spends one week in each EA and interviews take place between Wednesdays to Sundays. This reduces the use of proxy response, as it gives enumerators time to interview the eligible respondents in person. Those respondents not available for interviews on weekdays may likely be available on weekends. Reducing the number of proxy responses improves data quality.	
<b><u>Questionnaires</u></b> A structured questionnaire was used for NLFS. A household questionnaire was administered in each household, which collected various information on Identification, Demographic Characteristics (inclusion of disability questions for 5 years or older), Education, Employed at work, Temporarily absence, Agricultural work and Market Orientation, Characteristics of main and secondary job, Unemployment and out of labour. Some of the questions were administered at household level while others were at individual level.	
<b>Data Collector(s)</b>	National Bureau of Statistics (NBS) , Federal Government of Nigeria (FGN)
<b><u>Supervision</u></b> The interview was conducted by teams of interviewers and each interviewing team comprised of a Supervisor. The roles of the Supervisor includes: -Contacted local authority officials in the areas assigned to a team to gain their cooperation. -Located the clusters or EAs for the team and assigning work to enumerators. -Checked the quality of the work of each enumerator through skim and spot checks. - Maintained the morale of the enumerators so that they can work in a cheerful atmosphere. -Observed some of the enumerators' interviews to ensure questions are properly and politely asked and interpreted correctly. -Helped enumerators resolve problems encountered in the field, including in terms of locating households and with difficult respondents. -Met with each enumerator on a daily basis to discuss performance and future assignments. - Verified the completeness of all questions before leaving the locality. - Wrote a comprehensive report of the data collected in their team.	
<b>Data Processing &amp; Appraisal</b>	
<b><u>Data Editing</u></b> Real - Time data editing took place at different stages throughout the processing which includes: 1) Data editing and cleaning 2) Structure checking and completeness 3) Secondary editing 4) Structural checking of data files	
<b><u>Other Processing</u></b> The questionnaire was digitized into CAPI using Survey Solutions. Real time online Checks were done by dedicated team of Data Editors who checked for any errors in the data downloaded from the server and communicated any corrections or clarifications to the enumerators.  Data was cleaned prior to its analysis and exported from Survey Solutions to SPSS format.	
<b><u>Estimates of Sampling Error</u></b> The margin of error of each quarter is 1% for national estimates.	
<b><u>Other Forms of Data Appraisal</u></b> A series of data quality tables and graphs are available in the reports.	

<b>Accessibility</b>	
<b>Access Authority</b>	National Bureau of Statistics (NBS) (Federal Government of Nigeria (FGN)) , <a href="http://www.nigerianstat.gov.ng">www.nigerianstat.gov.ng</a> , <a href="mailto:feedback@nigerianstat.gov.ng">feedback@nigerianstat.gov.ng</a>

# Files Description

Dataset contains 2 file(s)

NLFS_2024Q2_HOUSEHOLD IDENTIFICATION	
# Cases	8806
# Variable(s)	11
<b><u>File Content</u></b> This file contains household identification data as well as administrative data as regards administering and managing the questionnaire.	
<b><u>Producer</u></b> National Bureau of Statistics (NBS)	
<b><u>Version</u></b> Version 1.0	
<b><u>Processing Checks</u></b> Checking and correction of all invalid codes and inconsistencies in the data. The data was also anonymized.	
<b><u>Missing Data</u></b> All missing data were represented as system missing in SPSS and they are missing due to skip in the structure of the questionnaire .	
<b><u>Notes</u></b> Generally, the variables were named to correspond with each of the questions in the questionnaire and "popw" variable represents Weight of each NLFS HH .	

NLFS_2024Q2_INDIVIDUAL	
# Cases	44852
# Variable(s)	213
<b><u>File Content</u></b> The file contains data related to the Identification of the questionnaire as well as the household.It also includes individual member data on their Demographic characteristics(inclusion of Disability Questions for 5 years or older),Education(3 years or older),Employment at work,Temporary absence,Agricultural work and Market Orientation,Characteristics of Main and Secondary job,working time and income,Unemployment and Out of labour.The weighting coefficient is in the data.

## # id7a\_structure: id7a. structure id

Information	[Type= continuous] [Format=numeric] [Range= 1-373] [Missing=*]
Statistics [NW/ W]	[Valid=44852 /-] [Invalid=0 /-]
Imputation	STRUCTURE ID

## # id7\_hhnumber: household number

Information	[Type= discrete] [Format=numeric] [Range= 1-14] [Missing=*]
Statistics [NW/ W]	[Valid=44852 /-] [Invalid=0 /-]
Literal question	ID7.HH Serial Number

## # hhroster\_id: id in hhroster

Information	[Type= continuous] [Format=numeric] [Range= 1-31] [Missing=*]
Statistics [NW/ W]	[Valid=44852 /-] [Invalid=0 /-]
Literal question	DC1. Line Number

## # interview\_id: unique 32-character long identifier of the interview

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=44852 /-] [Invalid=0 /-]
Imputation	interview_id

# File : NLFS\_2024Q2\_INDIVIDUAL

## # interviewdate: interview start date

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=44852 /-]
Literal question	ID4a. Time interview started (GMT)

## # dc3: sex

Information	[Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]
Statistics [NW/ W]	[Valid=44852 /-] [Invalid=0 /-]
Literal question	DC3. SEX

Value	Label	Cases	Percentage
1	MALE	22517	50.2%
2	FEMALE	22335	49.8%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

## # dc4: what is (nameâ€™s) relationship to the head of the household?

Information	[Type= discrete] [Format=numeric] [Range= 1-16] [Missing=*]
Statistics [NW/ W]	[Valid=44852 /-] [Invalid=0 /-]
Literal question	DC4.What is relationship to the head of the household?

Value	Label	Cases	Percentage
1	HEAD	8806	19.6%
2	SPOUSE	7379	16.5%
3	OWN CHILD	25319	56.5%
