METHODOLOGY

The data collection was conducted in sample outlets spread across 774 local government areas in all the 36 states and the FCT, Abuja. The data was collected from over 10,000 respondents located in the outlets. The estimates were derived from the weights generated from household expenditure on fuel and the actual prices households bought those fuels. This data collection exercise was done by over 700 NBS staff in all the states and the FCT and were closely monitored by quality control officers with sophisticated monitoring guidelines.

The average prices are reported for each state and the FCT, Abuja accordingly.
